DETAILED ACTION

Allowable Subject Matter

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1 and 8 recite a method and apparatus for system, which publishes information and receives information from subscribers. There is an aggregation step and then "selecting based on at least one criterion a best time to place said group order". The "selecting based on at least one criterion a best time" is the feature, which in combination with the previous steps, is not shown or taught by the prior art. Per the Board of Patent Appeals decision, dated 8/31/05, the Walker et al. (US 6,418,415) reference showed all the limitations except for "selecting based on at least one criterion a best time". While the offer expiration times and contract lead times of Walker are inherent, neither shows or teaches the above step. In subsequent searches, no references were found to properly modify the Walker system in order to meet the recited limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Deguchi et al. foreign reference shows a system, which selects an optimum time, but it is used in a computer control processing system. The anonymous Retailing Today NPL reference show an aggregating system of interest.
